

Foxbat
Australia

BUSINESS FOR SALE

Foxbat Australia Pty Ltd is one of the top three importers of Light Sport Aircraft in Australia and is known for its high quality service and professional approach.

Since the first aircraft delivery in late 2004, over 225 A22LS Foxbat/Kelpie and A32 Vixxen aircraft have been sold throughout Australia.

The aircraft themselves have an enviable reputation for their rugged airframes and easy, safe flying characteristics. In addition to flying clubs/schools and private buyers, many examples have been sold to farmers/station owners, who find the very short take-off and landing performance and safe slow flight capabilities perfectly suited to land management. The aircraft are well supported with a local stock of commonly required parts.

The time has now come for Foxbat Australia to pass to a new owner, who will be able to inject fresh energy and enthusiasm and build on the solid foundations of the current business. Even in these tough times, sales of Foxbat/Kelpie/Vixxen aircraft remain buoyant and the signs are all there for continuing and growing success into the future.
