

ADVERTISING INFORMATION

Material deadline is always the last Thursday of the month prior.

ADVERTISING OPTIONS

Aviation Trader is a 'free format' publication offering clients the opportunity to advertise in boxed display format or classified format and in mono or colour. Display advertising can be placed in the general section which forms the bulk of the publication or in the specific 'targeted' sections that follow. Current sections include Featured Aircraft, Holiday and Short Stay Destinations, Flight Connected Real Estate, Employment and also Training and Endorsements. A Classified section follows for line ads (maximum 10 lines) with an accompanying photograph if desired. Display ads can be sized in depth from 2 cms to 38 cms and in width 2 columns (7.3cm wide), 3 columns (11.1cm wide), 4 columns (14.9cm wide), 5 columns (18.7cm wide) or 7 columns (26.3cm wide). Display advertising pages are built using a sophisticated placement technique that employs size, content and style as key inputs. Classified advertisements are placed in pre determined categories and listed in alphabetical order.

ADVERTISING RATES

Our design team would be pleased to discuss advertising options, recommend a suitable product, format and style and also provide a fixed price quotation. To discuss your requirements freecall 1800 025 776 or email us at ads@aviationtrader.com.au with a specific request.

DESIGN

Many advertisers choose professional design houses to optimize the presentation of their advertisements. Alternatively, we currently provide a professional layout service designed to help clients develop advertising concepts and effective presentations.

EXPRESS WEB UPLOADS

We are now in a position to offer an express web upload service. This allows us to present advertisements as 'Latest

Listings' on our website within one hour of receipt. This service will suit advertisers who may have missed a monthly deadline or who wish to give themselves the opportunity to promote or sell a product or service in real time between issues. 'Latest Listings' are currently only offered to clients with a confirmed print booking.

COPY / FILE COMPATIBILITY

A print ready PDF file is the preferred file type for clients wishing to supply their final material for print. We also accept material by email, fax or post and also by phone for small display ads and classifieds.

Creating a PDF: It is essential that our Distiller job options be used when creating PDFs to ensure compatibility. These can be emailed upon request. To assist with payment and scheduling, we ask clients to provide their name and that of the advertiser if different, a billing address, preferred ad size and the issue or issues in which it is to run.

Email Attachments: Email attachments must be supplied in formats that are compatible with our design software and saved with the appropriate extensions i.e PDF (.pdf ext), JPG (.jpg ext), EPS (.eps ext), TIF (.tif ext) and for text, Word (.doc ext), or Text only (.txt ext).

PLEASE DO NOT EMBED IMAGES OR GRAPHICS IN WORD DOCUMENTS AS THEY WILL BE RECEIVED AS LOW RESOLUTION FILES.

Images and Graphics: If sending images or graphics files, please ensure that they are of adequate resolution. Our design team can provide you with their recommendations in this regard.

Digital Cameras: Please note that some digital cameras on normal settings produce low resolution pictures (72 dpi) which are unsuitable for printing. Therefore please try to use a higher resolution setting on your camera prior to taking your photos. **Scanning:** Some scanning programmes offer the option to save for web or print. **In this case select print.**

SPECIAL NOTE TO DESIGNERS

Aviation Trader is printed on 60 gsm newsprint on a web offset press. When designing colour material, please avoid reverse type using small or fine fonts. Dot gain & paper stretching during the print process may effect registration precision. As a guide, a 9 point strong sans serif font should be considered an absolute minimum in this application. **Also please use process black (100% K) rather than registration black (made up of CMYK) to minimise offsetting.**

We also ask that when optimising images to be used in your supplied pdfs you lighten and sharpen the images more so than you would for a gloss publication. This will allow our print partner the opportunity to deliver the highest possible print quality. As a guide we do the following to our images in preparation for print. Using Adobe Photoshop we lighten the image using 'Curves', use the 'Brighten/Contrast' action in 'Adjustments' to adjust the contrast, and then the 'Unsharp Mask' in 'Filters' to sharpen the image for newsprint. Please contact our Production Team if you need any guidance in managing this process.
